

Tips For Creating A Reading Map

WVLA Fall Conference 2009

Choosing A Topic

- Be specific
- Channel local zeitgeist (look for hot books or movies; popular pastimes; anniversaries; etc.)
- Look at your collection – are there especially strong areas? underused areas?
- How long will it be relevant?

Choosing Titles

- Break down a book by appeal elements (characterization, plot, setting, tone, pacing)
- Think about associations (historical events, activities, VAMPIRES)
- Collaborate with staff members, patrons – take advantage of local “experts”
- Use Novelist (via WV Info Depot)

Tips

- ANNOTATE!!! – sell your selections
- Keep lists manageable – around ten titles each
- Mix fiction and nonfiction or mix formats – encourage patrons to EXPLORE
- Collaborate
- Give each reading map a unique look but keep the format consistent

Tech Support

- HTML is best, but Word or PDF files work as well
 - o Try a tutorial – HTML, CSS, etc: <http://www.w3schools.com/default.asp>
- Cascading Style Sheets (CSS) can make your design more consistent.
 - o CSS Techniques: <http://www.alistapart.com/>
- Get to the top of that Google search!
 - o Search Engine Optimization (SEO) Techniques: <http://freelancefolder.com/10-top-seo-techniques/>
